

SINGLE-STATE AGENCY DIRECTORY:

Prevention and Treatment of Substance Use and Mental Disorders

Each U.S. State and territory offers information and support regarding substance use and mental disorders through the local government offices listed below. The following facilities are licensed, certified, or otherwise approved for inclusion by their State's substance use and mental health treatment authority. Their role is to plan, carry out, and evaluate substance use and mental disorder prevention and treatment services provided to individuals and families. During disasters, these offices can play a critical role in directing resources where they are most needed. Specifically, they oversee treatment centers and counselors in their respective States and, in many cases, supply funding to providers, track State trends, and ensure that residents receive the services to which they are entitled. **Unless the substance use and mental health offices are combined—as they are in several States—the mental health services office is listed first, followed by prevention services, then the substance use services office.**

Alabama
