Self Care: Balancing Family, Career and Recreation

Anyone who has flown on an airplane and listened to the flight attendant before takeoff has been cautioned what to do in the event the oxygen masks fall from the ceiling: Put on your own mask first before trying to help someone else. Counselor wellness experts say that idea has mileage on the ground, too.

Helping yourself first is a principle that applies directly to all in the field of substance use disorders treatment. This afternoon will be spent in a highly interactive format exploring that sometimes elusive term—BALANCE!
